

Webinar Questions and Answers  
PharmaCI: The Competitive Intelligence Solution for the Life Sciences  
5/25/05

Q: Would it be possible to add other sites to your federated search? We have some subscription sites eg. IdDB that we use a lot. It would be great if we could use these sites side-by-side with the ones that you have.

A: Absolutely. We can add any subscriptions to the competitive intelligence platform. We can also add internal sources of data, such as:

- Databases
- Public Web pages
- Subscription sites (paid for) and deal with security issues (login) for easy integration

Q: Do you have an advanced search screen that would help non-expert users run more complex queries?

A: Not for this version, but there is a planned extension that will contain an advanced search screen with multiple fields - you can combine terms and save queries.

Q: Do you allow users to add notes or comments to documents? For collaborative reasons?

A: It is a planned extension after getting feedback to do this. The planned extension for the next release would enable:

- Users to add notes/comments
- Another group to add notes/comments
- Shared notes/comments across the enterprise
